CONTENTS

PART I. GENERAL FINDINGS AND INTERPRETATIONS:	Page
Problem of compiling statistics of higher education.....	1
Number and distribution of institutions reporting.....	5
Totals by States.....	6
Professional schools by States.....	7
Historical summary, 1900 to 1934.....	8
Factors affecting teachers college enrollments.....	9
High-school and college enrollments.....	11
Decline of the county normal school.....	11
Rise of the junior college.....	12
Other trends.....	12
Faculty, students, and degrees:	
Faculty.....	13
Students.....	14
(a) Total enrollments.....	14
(b) An analysis of the effects of the depression.....	15
(c) Percentages of men and of women students.....	18
(d) Number of freshmen.....	20
(e) Students in other types of courses.....	20
Degrees.....	21
Finances, general summary:	
Receipts from:	
(a) Public funds.....	22
(b) Student fees.....	22
(c) Endowments.....	22
(d) Gifts and grants.....	22
(e) Nonsalaried service.....	23
Educational and general funds:	
Receipts.....	23
Expenditures.....	25
Auxiliary enterprises and activities.....	26
Other noneducational transactions.....	26
Plant funds.....	26
Capital fund receipts.....	26
Property.....	26
PART II. SUMMARY TABLES FOR THE UNITED STATES.....	29
Table 1. Historical summary, 1900-1934.....	31
1. Universities, colleges, professional schools, and junior colleges.....	31
2. Teachers colleges and normal schools.....	32
Table 2. Faculty, students, and degrees, 1933-34 (1,418 institutions).....	34
Table 3. Financial data. Totals for selected items, all institutions combined, 1933-34, compared with 1931-32.....	38
1. Receipts.....	38
2. Expenditures (current) and capital outlay.....	40
3. Property.....	44

CHAPTER IV

STATISTICS OF HIGHER EDUCATION, 1933-34

Prepared by EMERY M. FOSTER, *Chief, Division of Statistics*, HENRY G. BADGER, *Assistant Statistician*, and MARGARET J. S. CARR, BLANCHE K. CHOATE, MAUDE FARR, and ROSE M. SMITH, *statistical clerks in the division*; and by FREDERICK J. KELLY, *Chief, Division of Higher Education*, and WALTER J. GREENLEAF, *Specialist in Higher Education*.

PART I. GENERAL FINDINGS AND INTERPRETATIONS

PROBLEM OF COMPILING STATISTICS OF HIGHER EDUCATION

The publication each 2 years by the Office of Education of a statistical report dealing with the institutions of higher education leads an occasional reader to a misconception of the Federal Government's relation to higher education. There is no national system of higher education in this country. Except for the 69 land-grant colleges and universities, and the Army, Navy, and Marine training schools, the Federal Government exercises no administrative jurisdiction over any of the institutions of higher education. Whether or not an institution is to be regarded as a college for purposes of these statistical compilations depends upon certain arbitrarily chosen facts such as enrollment, accreditation, etc. Several fairly large groups of institutions which provide education at a level above the high school are not included in the compilations. Typical of these groups are private business colleges, private art schools, and schools specializing in training for certain healing cults not approved by the medical profession.

To a certain extent, higher education is a part of each State system of education. Each recognized institution of higher education is chartered by the State in which it is located. The charter provisions vary, however, from State to State to an amazing extent. In one State, for example, a small number of citizens may draw up a charter and present it for approval to an official such as the Secretary of State. This official is not charged by law with any particular responsibility for insisting upon certain standards before approving charters; therefore, a charter may be granted to the applying group authorizing

them to establish a college and to grant degrees but not requiring them to meet any well-defined standards of education.

In another State the applicants for a charter must present their application to the State department of education which is charged by law with the responsibility of determining whether the proposed institution can meet certain specified requirements. Thus not only are weak, poorly financed colleges prevented from incorporating, but all of the colleges of the State are checked up from time to time to make sure that they continue to meet the standards set by the State department of education.

Under the circumstances in many States each institution is more or less free to go its own way, to offer few or many courses as it likes, to hire well-trained teachers or poorly trained teachers, to charge high tuition fees or low tuition fees, to maintain dormitories or not, and otherwise to make its own definition of a college or university. It follows from this lack of uniformity that the United States Office of Education in its efforts to report statistical data for the colleges and universities works under severe limitations. Furthermore, it must rely upon the voluntary cooperation of each institution in supplying the requested data. In general, the cooperation is most cordial. A few find the labor of filling out the blanks more than they are willing to give to the task. It is obvious, therefore, that statistical compilations of the Office of Education can never report data for 100 percent of the colleges and universities of the country. One biennium certain institutions will have to be omitted and another biennium certain others. The institutions omitted will not necessarily be the same in succeeding bienniums. Furthermore, an institution may supply some data, but not all that the blanks call for.

In the statistical compilations found in the following pages the data were gathered by means of two questionnaires—one on faculty, students, and degrees; and the other on receipts, expenditures, and property. These questionnaires were sent to all the 1,465 institutions listed in the 1934 Office of Education Educational Directory. This directory list is made up as follows:

- A. Universities, colleges, and teachers colleges:
 - 1. Accredited by a national or regional accrediting association.
 - 2. All State-supported institutions of collegiate grade.
 - 3. Four-year institutions not accredited by any agency, but enrolling at least 100 resident college students in regular session and graduating at least 10 students annually.
- B. Independent professional and technological schools:
 - 1. Accredited by professional associations or approved by State universities or State departments of education.
 - 2. Not accredited by any agency but enrolling at least 25 resident students of college grade in regular session and graduating at least 5 students annually.

C. Junior colleges and normal schools:

1. Accredited by a national or regional accrediting agency.
2. Not accredited by any agency but:
 - (a) Requiring high-school graduation for entrance.
 - (b) Offering 2 years of work of college grade.
 - (c) Enrolling 50 or more resident students of college grade in regular session.

(It should be noted also that questionnaires were sent to and replies received from institutions of college grade in the outlying parts of the United States, but these institutions are not included in the general summaries. Reports were also received from approximately 70 institutions not listed in the 1934 directory. These reports, involving approximately 10,000 students, are not included in the summaries here presented.)

Of the 1,465 questionnaires sent out, usable returns on the personnel blank were received from 1,418 institutions. Not all of these institutions supplied data on every item. In some cases where the items do not change materially from biennium to biennium data from the previous biennial report were substituted for the missing data in the 1934 report rather than to leave the item blank.

Of the 1,465 questionnaires on receipts, expenditures, and property sent out, 1,357 usable returns were received. (In a few cases which are indicated by footnotes in the detailed tables, reports from the previous biennium were used and are counted in the 1,357.) All of these returns reported receipts, but only 1,327 of them reported on items of expenditure and only 1,269 of them reported the value of their property.

While it is impossible to indicate exactly the significance of these omissions, the following statements may help to give some indication of the types of schools failing to report.

First, of those failing to report on the personnel blank, very few were among the publicly controlled institutions or the large privately controlled universities, colleges, and professional schools. Practically all were highly specialized technical schools such as conservatories of music, theological seminaries, law schools, schools of optometry, or were among the junior colleges and normal schools intimately associated with public high schools or if under private control lately raised from the status of preparatory schools. The total enrollment of all these schools probably does not exceed 10,000 students.

The omissions from the list of institutions supplying financial data while outnumbering those failing to supply personnel data, consist almost entirely of these same groups of schools: Privately controlled technical or professional schools and junior colleges maintained by city or district school authorities. Comparatively few of the schools in this latter group maintain accounting systems which enable them to supply data for the junior college separate from data for the high

school. With almost no exception, all the larger institutions—whether privately controlled, church controlled, or publicly controlled, report data concerning their receipts. A very few of the better known institutions do not report items of expenditure, but a somewhat larger number, including some of the best recognized institutions, do not report the value of their property. Considering all of these omissions, however, it is conservative to estimate that if all institutions reported their financial data the national totals of receipts found in the statistical tables would not be increased by more than 3 percent, the national totals of expenditures would not be increased by more than 5 percent, and those on value of property would not be increased by more than 10 percent.

One other uncertainty must be dealt with in handling statistical tables for institutions of higher education, namely the comparisons of totals of items one biennium with another. For example, in the statistical compilations for 1931-32, personnel data were reported by 1,460 institutions. In 1933-34 the number reporting personnel data is 1,418, a decrease of 42. Before comparisons between these two biennial reports can be made, it is necessary to appraise the significance of this reduction of 42 institutions.

A careful study was made of just which institutions reported one year and not the other. It was found that the principal categories in which reductions occurred were the junior colleges, particularly the public junior colleges and normal schools. However, 16 of the 42 are accounted for by consolidations by virtue of which two or more institutions which reported separately in 1932 reported as a single institution in 1934.

In order to derive a more accurate measure of the significance of this reduced number of institutions reporting, enrollment figures were compiled for each of the two biennial reports for the 1,369 identical institutions which reported both years. It was found that in 1932 these institutions reported enrollments of 660,354 men, 480,067 women—a total of 1,140,421. In 1934 the same institutions reported 610,955 men, 434,657 women—a total of 1,045,612. This means a drop in enrollment from one biennium to another of 49,399 men, or 7.48 percent, a drop of 45,410 women, or 9.46 percent, or a drop of 94,809 in the total, or 8.31 percent.

From this it will be observed that the diminished number of institutions reporting accounts for a decrease of only 3,948 students of the total decrease for all institutions reporting in the two bienniums, of 98,757. It appears, therefore, that even though the number of institutions reporting may vary somewhat from biennium to biennium comparisons of totals from one biennium to another are not seriously invalidated by that fact.

Finally, there is still a great lack of uniformity in the interpretation of items in the questionnaires and consequent lack of consistency in the replies. This is true to an astonishing degree, even in some items in most common usage. For example, in counting students most schools count every person registered, regardless of the amount of work carried by that person; one large university, however, reports all students on a full-time equivalent basis.¹⁴ Again, an institution consisting of a liberal arts college and one other school (music, for example) which is managed by a quasi-independent dean will sometimes report all of its personnel but omit the finances of the related school.

One aspect of the Office of Education policy has a direct bearing upon the authenticity of the reports. Where institutions experience difficulty in filling out the blanks, they are visited and assisted by a representative of the Statistical Division of the Office. Such visits were made to approximately 20 percent of the institutions which submitted reports in 1934.

The Office of Education carefully goes over all reports and edits them with a view to uniformity of interpretation, but in spite of progress toward uniformity it is recognized quite frankly that certain differences in recording data still exist among the institutions.

Mention should be made of the work of the National Committee on Standard Reports for Institutions of Higher Education in the direction of uniformity of reporting higher education finance data, which continued during the biennium 1932-34. The results of this work are far-reaching in their scope and implications. Already the recommendations of the committee have been written into law in a few States. Each year sees an increasing number of universities and colleges voluntarily adopting the system of accounting recommended by this committee. The American Association of Junior Colleges has recently authorized the appointment of a committee to report on the possibility of uniform financial reports for junior colleges.

The work of the National Committee included some study of the possibilities of conventionalizing personnel data. While the committee did not go deeply into this subject, there is very noticeable improvement in this phase of higher education statistics.

The setting up of a unit of attendance known as the full-time student equivalent is one of the achievements of the committee which will facilitate greatly the study of unit costs in higher education, if and when such unit is adopted by colleges generally.

NUMBER AND DISTRIBUTION OF INSTITUTIONS REPORTING

Totals by States.—The number of institutions of various types in the different States which reported personnel data is shown in the accompanying table A. Here the variation from 1932 to 1934 may be noted.

TABLE A.—NUMBER OF INSTITUTIONS REPORTING PERSONNEL DATA

State or outlying part	UNIVERSITIES, COLLEGES, AND PROFESSIONAL SCHOOLS				TEACHER-TRAINING INSTITUTIONS				TOTAL 1933-34	TOTAL 1931-32

Outlying parts of the United States										
Alaska	1								1	1
Hawaii	1								1	1
Philippine Islands						1			1	1
Puerto Rico	1								1	1

Here it will be noted that six States (California, Illinois, New York, Ohio, Pennsylvania, and Texas) report 60 or more institutions each. The same number of States were in this group in 1931-32, but Missouri dropped to 54 in 1933-34, whereas Ohio reported only 58 in 1931-32.

At the other end of the scale we find 13 States reporting not more than 10 institutions each, the list being identical for the two periods.

Professional schools by States.—Many of the 1,418 institutions reporting maintain professional schools or departments as part of their organization. The distribution of the more commonly found of these schools is shown in table B. The total number of professional schools listed is 1,294; in 1931-32 the corresponding number of schools listed was 1,235.

Hasty generalizations should not be made from this table. The fact, for instance, that no school of agriculture is listed in Connecticut, no school of journalism in Indiana, no school of music in Virginia, does not mean that these subjects are not offered in these States. It means only that they are not set off in separately organized and administered schools. In many instances professional curricula in various fields are offered in colleges of arts and sciences. These professional courses are not included in this tabulation.

HISTORICAL SUMMARY, 1900-1934

Table C shows the trend in population as compared with the trend in college enrollments from 1900 to 1934.

It will be observed that whereas there were 313 students per 100,000 of population in 1900, the number increased to 833 in 1934, or 2½ times.

A further analysis reveals, however, that one group of institutions, namely, the teachers colleges and normal schools did not share proportionately in that increase. The number of collegiate grade students attending teachers colleges and normal schools per 100,000 of population was: 92 in 1900; 78 in 1905; 96 in 1910; 101 in 1915; 128 in 1920; 144 in 1930; 132 in 1932; and 108 in 1934.

While the total enrollment of collegiate grade students in teachers colleges and normal schools increased by 96 percent during the 34 years, the number of such students per 100,000 total population

increased only from 91 to 108 in the same period. Furthermore, during this period many of the teachers colleges and normal schools lengthened their curricula from 2 to 4 years, a change which should tend to hold students longer in the institutions. This would normally have increased their enrollment figures. The change in classification of some teachers colleges and normal schools to universities or colleges (offering general courses in addition to teacher-training work) tended, however, to decrease the enrollments reported for the independent professional teacher-training institutions during this period.

TABLE C.—POPULATION AND STUDENT ENROLLMENT IN HIGHER EDUCATION, 1900-1934

¹ Population for intercensal years (1905, 1915, 1932, and 1934) estimated by Bureau of Census.

² Resident students of college grade, regular session (September to June) only, duplicates omitted.

Factors affecting teachers college enrollments.—The above facts justify further analysis of the situation respecting teachers colleges, although these institutions train only part of the supply of teachers. Such an analysis is given in the following paragraphs.

Teachers colleges and normal schools are essentially professional in their purpose. Therefore, so long as the supply of properly prepared teachers is kept up, regardless of the type of institution in which they are prepared, a decrease in enrollments should not be regarded as significant, except insofar as this decrease leaves educational plants only partially utilized. It is sound educational policy to limit the supply of teachers to only so much beyond demand as will stimulate growth in individual members of the profession and will tend to advance standards of certification.

Among the trends which affect teachers colleges, the following are probably the most important:

(a) The tenure of teachers is longer than formerly. This bears a direct relation to the number of new recruits needed each year in the teaching profession. While the question is too complex to be reduced to a single figure representing average tenure, probably the average tenure of teachers was not more than 4 years in 1900. Coffman found the median to be 4 years for women and 7 years for men in 1910.¹ An estimate based upon a Nation-wide survey indicates the median tenure for all types of teachers to be approximately 9 years in 1930-31.² The tenure has undoubtedly increased since 1931. From this it is clear that the number of new recruits each year per thousand teachers is less than half the number needed 34 years ago.

(b) The proportion of teachers entering the profession on certificates earned by examinations without attending special teacher-training institutions has been rapidly decreasing during the past 30 years until at present relatively few teachers are certificated without attendance at an institution approved for teacher-training. This trend operates to increase relatively the attendance at such teacher-training institutions during the later years.

No figures are available showing the extent of this change in practice, but some indication of its importance as a factor in teachers college enrollment may be inferred from the fact that whereas all the States held regular examinations for teachers applying for certification in 1900, State after State has discontinued the practice until at present only 23 States are known to hold teachers' certificate examinations to which applicants are admitted without regard to their record of attendance at a teacher-training institution. At present all the States provide for certificating teachers without examination on the basis of their records in teacher-training institutions. It is probably safe to say that in 1900 at least one-third of the teachers were being certificated without reference to any attendance at a teacher-training institution. Certain it is that the number so certificated today is negligible.

¹ Coffman, Lotus D. The social composition of the teaching population. New York, N. Y., Teachers college, Columbia University, 1911, pp. 25-26. (Contributions to education no. 41.)

² Evenden, Edward S., Gamble, Guy C., and Blue, Harold G. Teacher personnel in the United States. Washington, U. S. Government Printing Office, 1935, pp. 30-31. (Office of Education, Bulletin 1933 no. 10. National Survey of the Education of Teachers. Vol. II.)

(c) The increase in the numbers of elementary school teachers has been much less than of high-school teachers. Since many colleges and universities other than teachers colleges prepare high-school teachers, the increased load of teacher-training has fallen relatively less upon the teachers colleges and normal schools and relatively more upon the liberal arts colleges and universities.

High-school and college enrollments.—In connection with the rapid increase in college enrollments, the question is often asked whether an increasing proportion of high-school graduates is going on to college each year. In spite of the fact that the increase in enrollments in higher education since 1900 has been very marked, it has been much less marked than the increase in high-school enrollments. The percentage of high-school graduates entering college has been decreasing since 1900.

If we compare the enrollments in all types of secondary schools, including preparatory departments in colleges, with the collegiate grade enrollments in colleges and universities, including teachers colleges and normal schools, we find the following:

In 1900 the ratio was 1 college student to each 2.2 secondary school students: In 1910 the ratio was 1 to 3.2; in 1920, 1 to 4.2; in 1930, 1 to 4.4; and in 1934, 1 to 5.8.

From this it will be noted that the ratio of secondary school students to college students has more than doubled in 34 years.

Decline of the county normal school.—Certain types of institutions arise to meet a present need and then pass out when the need disappears. This is the case with the county normal school. Changes in the numbers of and attendance at county normal schools as reported during the past 20 years are shown in the following table D.

TABLE D.—DISTRIBUTION AND ENROLLMENT, COUNTY NORMAL SCHOOLS, 1913-14 TO 1933-34

Year	Schools	States represented	Enrollment
1	2	3	4
1913-14.....	25	1	1,284
1915-16.....	21	1	1,225
1917-18.....	45	3	1,838
1919-20.....	94	7	2,066
1921-22.....	95	8	4,243
1923-24.....	90	3	2,624
1925-26.....	108	3	2,824
1927-28.....	46	3	1,425
1929-30.....	47	2	1,250
1931-32.....	36	2	1,283
1933-34.....	13	2	455

Rise of the junior college.—In sharp contrast to the decline of the county normal school stands the rapid growth of the junior college. Statistics on this type of school have been collected by this office since 1918 only, but this period represents their era of greatest growth. Table E sets forth data on this point.

TABLE E.—NUMBER OF JUNIOR COLLEGES AND THEIR ENROLLMENT, 1917-18 to 1933-34

Year	All schools reporting		Publicly controlled		Privately controlled	
	Num- ber	Enrollment	Num- ber	Enrollment	Num- ber	Enrollment
1	2	3	4	5	6	7
1917-18.....	46	4,504	14	1,367	32	3,137
1918-20.....	52	8,102	10	2,940	42	5,162
1921-22.....	80	12,124	17	4,771	63	7,353
1923-24.....	132	20,559	39	9,240	93	11,319
1925-26.....	153	27,095	47	13,859	106	13,236
1927-28.....	248	44,855	114	28,437	134	16,418
1929-30.....	277	55,616	129	36,501	148	19,115
1931-32.....	342	85,063	159	58,887	183	26,176
1933-34.....	322	78,480	152	55,869	170	22,611

Here it will be noted that junior colleges increased rapidly both in numbers and in student enrollment up to 1931-32, but that they apparently participated in the general slump which came the succeeding biennium. When their total enrollments for 1931-32 and 1933-34, however, are compared with the total enrollments for all institutions of college grade for the same years, it will be seen that the percentage of the total enrollment found in junior colleges increased slightly.

(The data here given are those collected from institutions listed in the 1934 Educational Directory of this office. They are not to be confused with those carried in a recent bulletin of this office on junior colleges.³ Page 37 of this latter report explains some of the differences between it and this chapter.)

Other trends.—For other trends reference is made to table 1, pages 31-33, which gives a historical summary of certain items of general interest for institutions of higher education from 1899-1900 to 1933-34. It is in two parts, part 1 relating to universities, colleges, and professional schools, and part 2 having to do with teachers colleges and normal schools. Since the forms used for collecting data for 1931-32 and 1933-34 are not identical with those used up to 1929-30, table 1 should be studied in connection with table 2 rather than as an independent table.

³ Greenleaf, Walter J. Junior colleges. U. S. Department of the Interior, Office of Education, Bulletin 1936, No. 2.

FACULTY, STUDENTS, AND DEGREES, 1933-34

Table 2, page 34, gives a general summary of staff, resident students of college grade, and degrees conferred at institutions of higher education during the year 1933-34. The institutions are also classified according to type of control, curricular offering, and level of work offered.

Faculty.—The 1,418 institutions in the country required the equivalent of nearly 100,000 full-time staff members, including administrative officers, teachers, extension and research workers, and other professional employees, but not including clerical or custodial help.

This represents a decrease from the 1931-32 report, both in number of institutions reporting and in number of persons employed. Comparative figures for the years prior to 1931-32 are not available.

Resident instruction as distinguished from extension instruction and research claimed the services of 65,312 men and 23,173 women, or 88,485 persons in all. (These figures are not reduced to a full-time basis.) These included 78,612 persons thus employed in the university, college, and professional school group and 9,873 in the teacher-training school group. Of the total number reported, 86,914 were in work of collegiate grade and 2,251 in secondary instruction; 1,680 teachers (all but 5 of whom were in the university, college, and professional school group) were dividing their time between secondary and collegiate work and are listed in both categories.

Table F shows the changes in total number of teachers doing resident work of college grade from 1923-24 to 1933-34:

TABLE F.—RESIDENT INSTRUCTIONAL STAFF (ABOVE SECONDARY GRADE), 1923-24 TO 1933-34

Year	Number	Increase over previous report	
		Number	Percent
1	2	3	4
1923-24.....	63,999		
1925-26.....	70,674	6,675	10.4
1927-28.....	76,080	5,406	7.6
1929-30.....	82,386	6,306	8.3
1931-32.....	88,172	5,786	7.0
1933-34.....	86,914	1-1,258	1-1.4

¹ Decrease.

The number of staff members engaged in other services carried on by institutions of higher education is shown in table G.

TABLE G.—STAFF ENGAGED IN SPECIAL WORK OF VARIOUS SORTS, 1931-32 AND 1933-34

Type of work	1931-32	1933-34
Summer session, 1931 and 1933.....	26,139	24,790
Correspondence work.....	3,896	3,371
Extension class instruction.....	5,105	4,740

		(7.626)			(5.757)			(1.889)	

Students—(a) Total enrollments.—Institutions of higher education enrolled a total of more than 1,050,000 resident students of above-secondary grade during the regular session (September-June), 1933-34, and more than 300,000 for the summer session of 1933.

Table I shows that the total enrollment in the regular session increased continuously up to 1931-32, but that it dropped in 1933-34. The percentage of this decrease is 8.6.

TABLE I.—RESIDENT COLLEGE ENROLLMENTS IN ALL INSTITUTIONS OF HIGHER EDUCATION, 1923-24 to 1933-34, SUMMER SESSIONS EXCLUDED

Year	Enrollment	Increase over previous report	
		Number	Percent
1	2	3	4
1923-24.....	823,063		
1925-26.....	917,462	94,399	11.5
1927-28.....	1,053,955	136,493	14.9
1929-30.....	1,100,737	46,782	4.4
1931-32.....	1,154,117	53,380	4.9
1933-34.....	1,055,360	1-98,757	1-8.6

¹ Decrease.

(b) *An analysis of the effects of the depression.*—This drop in enrollments constitutes a sharp break in a long time trend. It is obviously attributable, at least in large part, to the economic depression. While business reached its low, possibly in 1932, colleges suffered most severely in 1934. It was to stem this tide of dropping enrollments, it will be recalled, that the Federal Emergency Relief Administration instituted in February 1934 its student-aid program, giving part-time jobs to college students who could not attend college without such aid.

It seems worth while at this point, therefore, to make some analysis of the drop in enrollments with a view to answering such questions as these:

What types of institutions suffered most?

Did the teaching staff suffer the same decrease in numbers as the students?

Was there a difference between the effects upon men and upon women?

Were there significant regional differences?

ENROLLMENTS BY TYPES OF INSTITUTIONS AND CURRICULA

As compared with a drop of 8.6 percent in total enrollments of regular collegiate grade students in all institutions between 1931-32 and 1933-34, the drop of comparable enrollments in certain types of schools and of curricula may be noted:

¹ Figures for Louisiana and Rhode Island are significantly affected by the fact that in each State a college of considerable size reported in 1934 which did not report in 1932.

From the foregoing analyses it will appear that the drop in enrollments from 1931-32 to 1933-34 was--

1. Much greater in the teachers colleges and normal schools than in the colleges and universities.
2. Slightly less in publicly-controlled institutions than in privately-controlled ones.

3. Much less among undergraduates in arts and sciences than among graduates.
4. Differences among men and women were as follows:
 - (a) Much greater among men than among women in undergraduate and graduate professional schools.
 - (b) Somewhat greater among men than among women in graduate schools of arts and sciences.
 - (c) Not significantly different in the undergraduate colleges of arts and sciences.
 - (d) Greater among women than among men in teachers colleges.
5. Very heavy in summer sessions.

With respect to the effect of the depression on the number of faculty members employed, the analysis shows that—

1. While the numbers of students in the colleges dropped between 7 and 15 percent depending upon what types of institutions are included, the faculties were reduced by less than 1 percent in the colleges of all types combined, excluding teachers colleges.
2. Marked reductions occurred in the faculties of preparatory departments.
3. Teachers colleges and normal schools suffered heavy losses among faculty members, but only approximately half as heavy as among student enrollments.

With respect to differences among States, the analysis shows that enrollments—

1. Increased in 10 States—Arizona, Arkansas, Delaware, Georgia, Idaho, Louisiana, New Jersey, North Dakota, Rhode Island, and Utah.
2. Decreased by less than 5 percent in 11 States—California, Connecticut, Florida, Minnesota, Montana, New Hampshire, North Carolina, Ohio, Texas, Vermont, and Washington.
3. Decreased by from 5 to 9 percent, inclusive, in 11 States—Alabama, Colorado, Iowa, Kansas, Kentucky, Nebraska, Nevada, New Mexico, Oklahoma, South Carolina, and Tennessee.
4. Decreased by 10 percent or more in 17 States—District of Columbia, Illinois, Indiana, Maine, Maryland, Massachusetts, Michigan, Mississippi, Missouri, New York, Oregon, Pennsylvania, South Dakota, Virginia, West Virginia, Wisconsin, and Wyoming.

(c) *Percentages of men and of women students.*—Table J divides enrollments by percentages between men and women in the various classes of institutions. It is interesting that the ratio, all institutions taken together, is approximately three men to two women. Considering the fact that women were admitted to institutions of higher education only such a short time ago this ratio is quite remarkable.

The thing of striking interest, however, is the variation among the several States. Reference is here made to table 5, pages 50-55. This table reveals that whereas New Hampshire enrolls more than three men to one woman and many other States such as Connecticut, District of Columbia, Maryland, and Rhode Island, enroll more than two men to each woman there are some States where the enrollment of women is greater than that of men. This is true, for example, in Kentucky, Mississippi, North Dakota, Oklahoma, and Tennessee.

TABLE J.—PERCENTAGE ANALYSIS OF RESIDENT COLLEGE ENROLLMENTS, BY TYPE AND CONTROL OF INSTITUTION AND BY SEX, 1933-34

Item	ALL INSTITUTIONS REPORTING			UNIVERSITIES, COLLEGES, AND PROFESSIONAL SCHOOLS			TEACHERS COLLEGES AND NORMAL SCHOOLS

		(96,733)			(78,480)			(18,253)	

In general, the New England States have a preponderance of men while the Southern States outrank others in the proportion of women. This may be partly accounted for by the probable fact that a larger proportion of the men from the Southern States than the women attend institutions of higher education elsewhere. It is probably true also that the New England colleges and universities draw more largely from men outside the region than from women outside the region.

According to a study of the residence and migration of college students,⁴ published by the Office of Education in 1934, of the students attending institutions in Connecticut, for example, only 43 percent were residents of Connecticut, while of all the students attending institutions in Kentucky, 86 percent were residents of Kentucky. Other differences almost as striking indicate the drawing power of New England institutions from the country at large, whereas other States do not draw students from outside their borders to anything like the same extent.

One other feature of the relative enrollments of men and women students is worthy of note. Whereas collegiate departments among universities, colleges, and professional schools, enroll nearly six women to seven men, the graduate departments enroll approximately

⁴ Kelly, Frederick J., and Patterson, Betty A. Residence and Migration of College Students. U. S. Department of the Interior, Office of Education. Pamphlet no. 48, 1934.

five women to nine men, and the professional schools enroll one woman to three men. These facts are, however, quite as remarkable for their revelation of the large number of women entering graduate and professional schools as for the fact that the number of women are relatively fewer in these schools than in the liberal arts colleges.

(d) *Number of freshmen.*—Table K presents an estimate of the total number of freshmen in institutions of higher education in 1931-32 and 1933-34. A number of institutions did not report on this item. The estimate is based on the freshmen enrollments reported by institutions having 91.38 percent of the total undergraduate enrollment in 1931-32 and 91.70 percent of it in 1933-34. The number of freshmen actually reported was increased by an appropriate percentage to derive the figures used in this table. The percent of freshmen in the total undergraduate enrollment decreased only very slightly, from 32.80 in 1931-32 to 32.17 in 1933-34.

When the estimated numbers of freshmen for the 2 years are compared, a decrease of 26,884, or 8 percent, is indicated. This may be compared with the decrease of 8.6 percent in total resident college enrollments already noted.

TABLE K.—ESTIMATED NUMBER OF FRESHMEN IN INSTITUTIONS OF HIGHER EDUCATION, 1931-32 AND 1933-34, BY LEVEL, CURRICULAR ORGANIZATION, AND CONTROL

Type of institution	1931-32 ¹		1933-34 ²

Total.....	336,997	32.80	310,113	32.17

¹ Based on 91.38 percent of undergraduate enrollment reported.

² Based on 91.70 percent of undergraduate enrollment reported.

(e) *Students in other types of courses.*—The enrollment figures so far given do not include the following: 45,592 collegiate and 15,651 noncollegiate students in correspondence work; 121,998 collegiate and

27,818 noncollegiate students in extension work; 32,901 persons taking short courses, usually of not more than 4 days to a week in length; 23,188 secondary pupils (not in training schools); and 13,121 secondary and 13,252 elementary pupils in training schools attached to colleges and normal schools. Further details of these enrollments will be found in table 9, page 66.

Degrees.—Slightly more than 136,000 persons took the baccalaureate or the first professional degree in 1933-34; more than 18,000 took the master's degree or a comparable advanced degree in engineering; and the doctorate was conferred on 2,815 persons. Each of these figures represents a decrease from 1931-32, the percents of decrease being: Baccalaureate and first professional 1.4, master's 5.6, doctor's 2.9.

When degrees in professional schools in 1933-34 are compared with those granted in 1931-32, some rather striking changes are noticeable. When professional school enrollments for the 2 years are brought into the comparison, these changes appear all the more striking, some professions showing a decrease in students, but an increase in degrees granted. Examples of this are in education, where a decrease of 13.2 percent in students contrasts with an increase of 3.1 percent in degrees. On the other hand, theology and law show sharper decreases in degrees granted than in student registration, a condition also shown by several of the professions attracting limited numbers of persons.

It would not be safe to read into these figures any evidence of a real trend either toward or away from a given profession. They measure only the number of students and degrees in organized professional schools; they do not include those carrying professional or preprofessional work in colleges of arts and sciences. Again, they do not run back far enough in time to warrant any statement as to trends.

The total number of honorary degrees reported in 1933-34 was 1,280. This is 9.7 percent more than in 1931-32, when 1,167 were reported.

The doctorate was as usual the most popular honorary degree, just 1,200 being of this grade. Twenty-six different types of doctorate were conferred, the four most popular being the LL. D., the D. D., the Sc. D., and the Litt. D. This order has remained constant since 1927-28. For the five bienniums prior to 1927-28 the same doctorates were the most popular, but the D. D. consistently outnumbered the LL. D.

Twelve varieties of honorary master's degrees were conferred on 75 persons, the M. A. and the M. S. being the most common.

Five other honorary degrees were conferred: Two M. E., and three bachelor's degrees (one each in arts, music, and pharmacy).

FINANCES, GENERAL SUMMARY

At the beginning of the biennium under review, higher education was beginning to feel the effects of the widespread economic distress. Sharp decreases in anticipated revenues were reported by college authorities. Higher education in general, which had already suffered some setbacks, began an era of real financial stringency.

The reductions in staff and students during the biennium have already been noted. Reductions in receipts and expenditures are, therefore, not surprising. These reductions, calculated from table 3, page 38, are: In educational and general receipts 14 percent, in educational and general expenditures 12.1 percent, and in capital outlay 70 percent. They are partially caused by decreases of 1.7 percent in number of schools reporting receipts and 2.2 percent in number of those reporting expenditures. But even when these decreases are taken into account there still remains a marked decrease in funds available for higher education.

Receipts—(a) From public funds.—Receipts of 1,357 institutions of higher education from all public sources totaled \$142,861,675 in 1933-34. This figure may be compared with \$199,641,930 reported by 1,380 institutions in 1931-32 and \$205,653,051 reported by 1,209 institutions in 1929-30.

(b) From student fees.—Receipts from student fees (for matriculation, tuition, laboratory and library fees, and other instructional purposes), as reported by 1,357 institutions, totaled \$138,257,350 in 1933-34. This represents a decrease of 8.2 percent from the \$150,649,047 reported by 1,380 institutions in 1931-32. In 1929-30 the corresponding figure, reported by 1,209 institutions, was \$144,125,879.

Student fees in 1933-34 constituted 17.9 percent of the total educational and general receipts of publicly controlled institutions; they amounted to 51.2 percent of the total in institutions under private control.

(c) From endowments.—Income from endowment came to a total of \$55,533,447 for all institutions reporting in 1933-34. It constituted 2.7 percent of the total educational and general receipts of publicly controlled institutions, but accounted for 24.7 percent of the total in institutions under private control.

This source of income shows a steady decrease since 1929-30, when it reached \$68,604,947, with 1,209 institutions reporting; in 1931-32 it was \$60,902,567. The same numbers of institutions are included in these figures as in those for student fees and for all other educational and general items.

(d) From gifts and grants.—Receipts from private gifts and grants totaled \$58,647,709 in 1933-34, which represents a sharp decrease from previous years. In 1931-32 they were reported at \$108,902,478.

and in 1929-30 at \$140,093,284. (The number of schools reporting receipts is uniform for a given year: 1,357 for 1933-34, 1,380 for 1931-32, and 1,209 for 1929-30.)

As might be expected, the bulk of private gifts to higher education went to institutions under private control, nearly \$53,000,000 going in this direction. Of special interest, however, is the shift in the share going to publicly controlled schools. In 1929-30 these schools received 6.3 percent of the total of all private gifts and grants reported; in 1931-32 their share was 7.1 percent; and in 1933-34 it rose to 9.8 percent.

Details of these receipts for 1933-34 are presented in table 15c, page 106.

(e) *Nonsalaried service*.—Included among the 58 million dollars of private gifts and benefactions is nonsalaried service valued by the institutions receiving it at a total of \$6,077,877. This is 19.1 percent more than in 1931-32, when \$5,102,905 was reported. The number of schools reporting this service rose from 141 in 1931-32 to 160 in 1933-34, an increase of 13.5 percent.

Details of this type of contribution to higher education are presented in table L.

TABLE L.—ESTIMATED VALUE OF NONSALARIED PERSONAL SERVICE RENDERED, INSTITUTIONS OF HIGHER EDUCATION, 1933-34

Type of institution	ALL INSTITUTIONS REPORTING		PUBLICLY CONTROLLED INSTITUTIONS		PRIVATELY CONTROLLED INSTITUTIONS	
	Number	Amount	Number	Amount	Number	Amount

Junior colleges.....	32	362,240	2	1,300	30	360,940
Total.....	155	6,037,877	5	80,300	150	5,957,577
Teacher-training schools:						
Teachers colleges.....	3	31,500	1	2,500	2	29,000
Normal schools.....	2	8,500			2	8,500
Total.....	5	40,000	1	2,500	4	37,500

Educational and general funds—(a) *Receipts*.—Total receipts for educational and general purposes, as reported by 1,357 institutions, were \$388,725,397. This represents a decrease of \$63,271,436, or 14 percent, from the corresponding receipts for 1931-32. That this

decrease is not confined to one source of revenue is evident when the figures for the 2 years (table 15 in each report) are compared. These decreases are, in percents: Student fees, 8.2; income from endowment, 8.8; receipts from public sources (Federal, State, and local governments), 21.3; private gifts and grants, 8.3; sales and services of educational departments, 16.2; other sources, 20.7. It is interesting to note that if the value of nonsalaried service for 1931-32 and 1933-34 is omitted and only cash gifts from private sources considered, the decrease in this item becomes 15.8 percent.

Percentage analyses of educational and general receipts of all institutions of higher education, classified by type, control, and level, are presented in table 4, page 46.

One particular trend in connection with college and university finances seems of unusual importance. That trend has to do with the relative importance of the sources from which income is derived. To reveal that trend from 1923-24 to 1933-34 table M has been prepared. The institutions are divided into the two classes—publicly controlled and privately controlled.

In this table it will be observed that the percentage of income derived from student fees in publicly controlled institutions rose from 12.7 to 16.7 percent during the 10 years, while the amount received from State and local governments decreased from 61.9 to 56.8 percent. Thus, the decrease in public support is about made up by the increase in student fees.

In the privately controlled group it will be observed that the percentage derived from student fees has remained approximately constant, but the income from endowment dropped from 25.6 to 22.7 percent. This amount was compensated for in the increase in private gifts and grants from 8.4 to 11.2 percent.

When all of the institutions are combined, it is observed that students are paying 4.2 percent more of the support than they did 10 years ago, while the State is paying 5.6 percent less of the support; and the institutions are getting from private gifts and grants 2 percent more than they did 10 years ago.

This trend may be very significant. The time-honored American boast that education is free from the kindergarten through the university seems not to be as true as it once was.

TABLE M.—PERCENTAGE ANALYSIS, RECEIPTS FOR CURRENT PURPOSES,¹ INSTITUTIONS OF HIGHER EDUCATION, 1923-24 AND 1933-34

Item	PERCENT					
	Publicly controlled institutions		Privately controlled institutions		All institutions reporting	
	1923-24	1933-34	1923-24	1933-34	1923-24	1933-34
1	2	3	4	5	6	7
Source reported by institutions.....	422	489	779	868	1,201	1,357
1. Student fees.....	12.7	16.7	47.0	47.2	28.8	33.0

Total.....	100.0	100.0	100.0	100.0	100.0	100.0

¹ Including educational and general, noneducational, and other nonrevolving funds.

(b) *Expenditures.*—Educational and general expenditures, reported by 1,327 institutions, totaled \$369,661,077 in 1933-34. This is \$50,971,476 less than the amount reported in 1931-32. Decreases are reported in all save one of the expenditure functions, as follows: Administration and general control 8.6 percent; resident instruction: Colleges, schools, and departments 12.6 percent, related activities 33.5 percent, total 14.4 percent; organized research 22.4 percent; extension 16.8 percent. An apparent increase of 17.6 percent in expenditures for libraries is due in large measure to changing the method of accounting; in 1931-32 new books for libraries were commonly charged to capital outlay, but in 1933-34 they were more frequently charged to the current library account.

Percentage analyses of the educational and general expenditures in degree-granting universities, colleges, and professional schools are given in table N. Analyses of these same expenditures, excepting extension, are presented in table 4, p. 46.

TABLE N.—PERCENTAGE ANALYSIS, ALL EDUCATIONAL AND GENERAL EXPENDITURES, DEGREE-GRANTING UNIVERSITIES, COLLEGES, AND PROFESSIONAL SCHOOLS, 1933-34

Organized research.....	9.3	2.5	5.4
Extension.....	13.0	1.2	6.2
Libraries.....	3.2	4.1	3.7
Physical plant operation and maintenance.....	11.6	14.8	13.5
Total.....	100.0	100.0	100.0

Auxiliary enterprises and activities.—Receipts from athletics totaled \$10,881,111; expenditures for the same purpose totaled \$11,338,337. Corresponding data for 1931-32 are: Receipts, \$15,050,335; expenditures, \$15,266,162.

All other auxiliary enterprises and activities, including residence and dining halls, student health service, college book stores and printing offices, student unions, dramatic clubs, Young Men's Christian Associations, Young Women's Christian Associations, and the like, involved total receipts of \$77,102,210 and expenditures of \$67,392,091. Corresponding figures for 1931-32 are: Receipts, \$88,218,556; expenditures, \$75,631,135.

Details of the 1933-34 transactions are found in table 15a, page 102, columns 11 and 12, and table 16, columns 12 and 13, page 109.

Other noneducational transactions.—Receipts for other noneducational purposes totaled \$9,653,266. These included income from invested annuity funds, scholarship and prize funds, gifts to be used for scholarships or other forms of student aid, and similar receipts.

Expenditures under this heading totaled \$20,937,898. These included payment of annuities, interest on loans, expenses of financial campaigns of an irregular nature (the regular campaigns conducted in some schools are carried as administrative charges), and fellowships, scholarships, and other forms of student aid.

Plant funds.—Receipts of \$41,802,871 for extension of physical plant were reported by the various institutions in 1933-34. This represents a decrease of 25.7 percent from 1931-32, when \$56,256,818 was reported. The 1933-34 figures included balances (amount not always reported) carried over from 1932-33, inasmuch as these funds were available for this purpose exclusively. They also included approximately 10 million dollars of private gifts and grants specially designated for plant extension.

Expenditures for this purpose in 1933-34 were: For buildings and grounds, \$20,953,641; for equipment, \$6,551,991; total, \$25,505,632, which may be compared with the 1931-32 total of \$98,388,697.

The fact that in some instances several months elapse between the receipt of money for building purposes and its final expenditure accounts in part for the differences between receipts and expenditures of this character for any given year.

Capital fund receipts.—Receipts intended for increase of the permanent funds of the various institutions over the country totaled \$27,477,968 in 1933-34, which is less by \$20,198,854, or 42.4 percent, than the amount reported in 1931-32.

Property.—Nearly 58 million bound volumes are reported in the libraries of 1,269 institutions of higher education over the country for the year ending June 30, 1934. Of the total number reported, 36.2 percent are at publicly controlled institutions and 63.8 percent

are at institutions under private control. This distribution contrasts with that in student enrollment, wherein 50.2 percent of all students are at publicly controlled institutions and 49.8 percent are at those under private control.

Buildings, grounds, and equipment used primarily for educational purposes were valued at a total of \$2,252,877,465 in 1934, which compares with \$2,207,294,577 reported in 1932. The increase, amounting to 2.1 percent, is net, being made up of new construction, new equipment, and newly acquired lands, and the like, partially offset by depreciation.

Endowment, student aid, and other permanent funds totaled \$1,539,727,565 in 1934. This figure cannot be compared with that reported in 1932 for the reason that the earlier figure included some noncash items, whereas that for 1934 includes cash items only.

Total.....	\$3, 504, 630	\$9, 310, 990	\$20, 163, 037	\$48, 299, 131	\$40, 311, 042	\$25, 918, 769
Total receipts from all sources.....	5, 236, 856	14, 688, 220	31, 395, 359	74, 69, 983, 932	59, 069, 316	43, 681, 581

1 Not tabulated by sex.

2 Collegiate, professional, and graduate departments.

3 Not tabulated separately.

4 Includes 982 men and 1,239 women teaching in other departments.

5 These figures not comparable with those of former years. "Collegiate" in 1932 figures means only colleges of arts and sciences, whereas formerly the term included engineering, education, commerce, etc., limiting "professional" in former years to theology, law, medicine, dentistry, pharmacy, osteopathy, and veterinary medicine.

6 Includes graduate students in both academic and professional departments.

7 See table B for types of professional work included.

8 Undergraduate enrollments only.

9 Includes 27,533 men and 38,326 women in other departments.

10 Includes 16,399 men and 22,754 women in other departments.

11 Includes 15,923 men and 14,225 women in other departments.

12 Not including subcollegiate students.

13 Information for 1932 and 1934 not complete because enrollment in engineering not shown in institutions classifying engineering as part of arts and science college.

14 Baccalaureate and first professional degrees.

15 Included with baccalaureate and graduate degrees.

16 Includes advanced professional degrees.

17 Data not collected.

18 Entire instructional staff, September to June.

19 Entire summer session instructional staff.

20 Data not available in tabular form.

21 Entire summer session enrollment.

22 Includes receipts from other than public funds for increase of plant.

23 Expenditure figures used for city normal schools.

24 All doctor's degrees.

TABLE 2.—FACULTY, STUDENTS, AND DEGREES, 1933-34 (1,418 INSTITUTIONS)

PART 5.—CERTAIN ITEMS AS DIVIDED BETWEEN PUBLICLY CONTROLLED AND PRIVATELY CONTROLLED INSTITUTIONS¹

PERSONNEL									
1. Number of institutions reporting.....	35.3	64.7	-----	24.6	75.4	-----	84.9	15.1	-----
2. Total full-time staff.....	46.2	53.8	-----	40.8	59.2	-----	91.7	8.3	-----
3. Total resident college students, September to June.....	50.2	49.8	-----	43.6	56.4	-----	95.0	5.0	-----
4. Total number of freshmen (partly estimated).....	55.3	44.7	-----	48.4	51.6	-----	90.2	9.8	-----
5. Baccalaureate and first professional degrees.....	46.6	53.4	-----	39.9	60.1	-----	95.9	4.1	-----
6. Master's degrees.....	39.4	60.6	-----	38.0	62.0	-----	78.3	21.7	-----
7. Doctor's degrees.....	35.4	64.6	-----	35.6	64.4	-----	-----	100.0	-----
8. Honorary degrees.....	11.3	88.7	-----	11.3	88.7	-----	-----	-----	-----
FINANCES									
1. Number of institutions reporting receipts.....	36.0	64.0	-----	25.2	74.8	-----	85.5	14.5	-----
2. Total educational and general receipts.....	47.2	52.8	-----	42.8	57.2	-----	93.3	6.7	-----
3. Total receipts for capital outlay.....	36.2	63.8	-----	33.2	66.8	-----	90.5	9.5	-----
4. Total additions to permanent funds.....	19.0	81.0	-----	18.9	81.1	-----	53.1	46.9	-----
5. Total receipts from public sources.....	93.8	6.2	-----	32.4	7.6	-----	100.0	(²)	-----
6. Total receipts from private gifts and grants.....	9.8	90.2	-----	9.5	90.5	-----	30.1	6.99	-----
7. Number of institutions reporting expenditures.....	36.5	63.5	-----	25.6	74.4	-----	86.2	13.8	-----
8. Total educational and general expenditures.....	47.7	52.3	-----	43.2	56.8	-----	93.0	7.0	-----
9. Total capital outlay.....	38.8	61.2	-----	35.2	64.8	-----	88.7	11.3	-----
PROPERTY									
1. Number of institutions reporting property.....	33.8	66.2	-----	22.2	77.8	-----	86.1	13.9	-----
2. Total number of bound volumes in libraries.....	36.2	63.8	-----	31.3	68.7	-----	93.6	6.4	-----
3. Total value of physical property.....	42.1	57.9	-----	37.1	62.9	-----	92.2	7.8	-----
4. Total value of all property, including funds.....	29.1	70.9	-----	25.6	74.4	-----	87.2	12.8	-----

¹ Varying numbers of institutions for different items.² Less than 1/10 of 1 percent.

¹ Architecture students 112, degrees 13; veterinary-medicine students 102, degrees 18, unclassified master's degrees 13
² Chemistry, metallurgy, and ceramics.

³ Music.
⁴ Architecture students 163, degrees 35; library science students 65, degrees 7; chemistry students 364, degrees 67.

^a Forestry students 146, degrees 17; music students 11, degree 1; veterinary-medicine students 117, degrees 15; science students 262, degrees 47; unclassified students 194. ^b Architecture students 23, degree 8. ^c Arts students 17, degree 2.

7 Architecture students 64, degrees 11, general-science students 284, degrees 32, industrial-education degrees 2. ^a

¹⁰ Geology students 29, degrees 5; metallurgy students 8, degrees 2; forestry students 8, degrees 16.

11 Architecture students 266, degrees 37; fine-arts students 172, degrees 13; journalism students 144, degrees 57; library-science students 88, degrees 55; music students 141,

¹² Forestry students 68, degrees 7; industrial-education students 32, degrees 5; physical-education students 110, degrees 21.

¹³ Forestry students 130, degrees 17; agricultural-journalism students 30, degrees 7; veterinary-medicine students 154, degrees 62; unclassified students 2.

13. A veterinary-medicine student, 20, male, students 51, degrees 8; veterinary-medicine students 182, degrees 35; physical-education students 95, degrees 14; industrial-chemistry students 45, degrees 9.

¹⁰ Forestry students 28, degrees 4; journalism students 96, degrees 13; science students 87, degrees 44.

¹ Forestry students 43, degrees 16; chemistry students 38, degrees 9.
² Forestry students 43, degrees 16; chemistry students 38, degrees 9.
³ Forestry students 43, degrees 16; chemistry students 38, degrees 9.

¹⁵ Textile-chemistry students 95, degrees 17; nondegree students 34.
²⁰ Unclassified.

²¹ Veterinary-medicine students 88, degrees 16; forestry students 89, degrees 7.
²² Architecture students 209, degrees 32; forestry students 59, degrees 24; music students 126, degrees 54; dental-hygiene students 31, degrees 10; nursing students 126, degrees 24.

■ Architecture students 134, degrees 28; fine-arts students 1; forestry students 158, degrees 21; journalism students 8; music student 1; dental-hygiene students 66, degrees 14; unclassified students 1 012, degrees 74

¹⁴ Fine-arts students 34, degrees 6; Journalism students 304, degrees 129; music students 40, degrees 3; science students 6, degrees 2; unclassified students 81.

10

10

³³ Forestry students 100, degrees 8; journalism students 115, degrees 10; music students 40, degrees 4.

1. Fine arts.
2. Fine arts students 23; architecture students 4, degrees 1.
3. Fine arts students 112; music students 10, degrees 1.
4. Forestry students 45, degrees 4; unclassified students 16, degrees 7.

²⁰ Forestry students 94, degrees 11; textiles students 200, degrees 21; science students 20, degrees 10; unclassified students 7.

¹¹ Architecture students 14, degree 1; chemistry students 77, degrees 16.
¹² Architecture students 31, degrees 6; fine-arts students 85, degrees 13; music students 12, degrees 13.

³³ Veterinary students 249, degrees 35; applied-optics students 83, degrees 15; unclassified students 269.

3) Architecture.

a. Fine arts students 17, degrees 33; music students 26, degrees 37; science students 19, degrees 33; social science students 21, degrees 10; physical education students 4; unclassified students 11; forestry students 100.

³⁰ Architecture students 146, degrees 5; Journalism students 190, degrees 2; music students 80, degrees 2.

^a Architecture students 56, degrees 11; forestry student's 181, degrees 23; chemistry and other students 408, degrees 89; mineral-industries students 113, degrees 45; unclassified students 321.

- a) Deviants' course.
- a Physical education.
- c Vocational education.

to Chemistry students 60, degrees 19, textiles students 187, degrees 22, unclassified students 10.

- Journalism.
- Industrial education.
- Mental hygiene.

³⁰ Industrial-education students 30, degrees 4; 2-year secretarial students 11.

^{a)} Fine-arts students 127, degrees 16; music students 83, degrees 17; veterinary-medicine students 97, degrees 14; physical-education students 147, degrees 25; unclassified students 14.

3. Forestry students 157, degrees 20; library-science students 25, degrees 18,
4. Music students 8; physical-education students 115, degrees 26.

Edgewood Junior College of the Sacred Heart, Madison.....	5,125				10,000			15,125					

¹ Name changed July 1, 1935, to University of Alaska.

² Negro.

³ Included in column 8.

⁴ Figures of 1931-32.

⁵ Not including receipts from Oregon State Board of Higher Education for extension and correspondence work formerly handled by University of Oregon.

⁶ Includes junior colleges at Oxford and Valdosta.

⁷ Figures of 1935.

⁸ All educational and general receipts.

⁹ Affiliated with, but financially independent of, Creighton University.

¹⁰ Includes athletics.

¹¹ Includes room and board.

¹² Report of parent institution does not include reports from allied corporations.

¹³ Includes \$2,870,188 from income-producing funds (\$36,181,228).

¹⁴ Name changed to Bard College after June 30, 1934.

¹⁵ Includes Y. M. C. A. School of Commerce.

¹⁶ City Teachers College.

¹⁷ Year ends November 1933.

¹⁸ City Normal School.

¹⁹ County Normal Schools (5 in Michigan, 8 in Wisconsin).

²⁰ Includes Gateway School.

¹ Negro.

² Detailed analysis of expenditures not available.

³ Not including pay of Naval personnel detailed to institution.

⁴ Not including pay of military personnel detailed to institution.

⁵ Statistics of 1932.

⁶ Not including expenditures of Oregon State Board of Higher Education for extension

and correspondence work formerly handled by the University of Oregon.

⁷ Included in column 3.

⁸ Estimated.

⁹ Statistics of 1931.

¹⁰ Report of parent institution does not include data from institutions allied with it.

¹¹ Name changed to Bard College after June 30, 1934.

¹² Statistics of 1935.

¹³ Including School of Commerce.

¹⁴ Distribution estimated.

¹⁵ City.

¹⁶ Included in column 11.

¹⁷ Total expenditures for 5 county normal schools in Michigan and 8 county normal schools in Wisconsin.

¹⁸ Statistics of 1933.

¹⁹ Not charged as part of junior college expense.

²⁰ Includes athletics.

¹ Figures for 1932.

² Does not include land-grant endowment.

³ Negro.

⁴ Included in column 4.

⁵ Figures for 1933.

⁶ Not including equipment of laboratories and classrooms.

⁷ Estimated.

⁸ Data not available.

⁹ Figures for 1933.

¹⁰ Includes junior colleges at Oxford and Valdosta.

¹¹ Atlanta University library used.

¹² Report of parent institution does not include data from institutions allied with it.

¹³ Affiliated with but financially independent of Creighton University.

¹⁴ Includes New Jersey Law School and Seth Boyden School of Business.

¹⁵ Includes New Jersey College for Women.

¹⁶ Includes annuity funds.

¹⁷ Not including other income-producing funds amounting to \$36,181,228.

¹⁸ Name changed to Bard College after June 30, 1934.

¹⁹ Includes William Smith College for Women.

²⁰ Equipment of Rabbi Elchanan Theological Seminary used.

²¹ Includes other funds.

²² Includes School of Commerce.

²³ Includes pamphlets.

²⁴ Not including value of library books.

²⁵ Includes Greenville Womens College.

²⁶ County Normal Schools in Michigan, 7 in Wisconsin.

²⁷ Property used jointly by junior college and public high school.

PART V.—LAND-GRANT COLLEGES AND UNIVERSITIES, 1932-33 AND 1933-34

By WALTER J. GREENLEAF
Specialist in Higher Education

This report on land-grant colleges and universities includes data contained in two separate studies previously issued, and supersedes Circulars 126 and 136.

1. For the year ended June 30, 1933, data are shown in tables 24 to 33, inclusive. A preliminary report for this same period was issued as Circular No. 126, on November 1, 1933, including all land-grant institutions whose reports were on file at that time; the preliminary figures have since been revised and completed with totals in tables 24 to 33.

2. For the year ended June 30, 1934, data are shown in tables 34 to 43, inclusive. A preliminary report was also issued for this period as Circular No. 136, on November 1, 1934, including all land-grant institutions whose reports were on file at that date. Tables 34 to 43 have been prepared from these preliminary figures which have been revised, completed, and totaled.

It is planned to issue preliminary statistics in mimeographed form each November in time for the annual meeting of the Association of Land-Grant Colleges. In this way current figures are available for the year ended the previous June. Practically all land-grant institutions now report during the fall and are included in the preliminary publication if returns are received before November 1.

The 2 years 1932 to 1934 are important ones to the land-grant institutions when the effects of the economic depression, not only on this group of 69 institutions but on higher education as a whole, are taken into consideration. Tables 24 to 33 are comparable with tables 34 to 43, and while space does not allow interpretation of these figures, it is possible to compare the 2 years institution by institution.

There are a few features and phases of higher education that deserve some attention as they affect the land-grant institutions. These subjects are discussed as follows:

LAND-GRANT COLLEGE FUNCTIONS

The real intent of the Land-Grant Act and the function of the agricultural college were questioned very early, and have never been com-

pletely settled. The colleges naturally looked to Mr. Morrill for guidance, and in 1867 he was invited to interpret the act in conference at the Yale Sheffield Scientific School (at that time a participant in the 1862 funds). The result of the conference was that he expected wide latitude in order to meet conditions locally in the different States. The colleges were not intended to be "agricultural schools", and the title of the bill was not Mr. Morrill's but a clerk's. He expected *scientific* work to be stressed rather than classical studies, but the work to be of college grade. He planned the bill so that old colleges might be built around a scientific core. He felt that there were classical colleges enough. As to farms, they might or might not be attached to the colleges; they furnished desirable aid in agricultural instruction, but he would not make them imperative. He wished to aid science instruction, scientific schools, and education for business pursuits.

In discussing the land-grant colleges in 1890, he pointed out that they are "institutions that do not lift the cost of their instruction out of the reach of the many, nor generate habits of profuse expenditure, and are healthy homes for students, especially for those destitute of hereditary resources, who look only to a life of honorable effort and labor. The most advanced studies were not * * * to be excluded from these colleges, and whenever provided with sufficient resources they should be ready to offer all the learning demanded by any portion of the American people, and yet they must not fall short in the branches related to agriculture and the mechanic arts, but must lead in the highest instruction asked for by the industrial classes. * * * Military tactics also were included among the subjects to be taught in the land-grant colleges, and * * * the thousands of trained young men who annually graduate from these colleges, should our country ever need their services, will not forget how to 'set a squadron in the field', and will be found as a reserve force of immense value—a value hardly less than that confidently relied upon from our renowned national institution at West Point."

Since Senator Morrill made the last of these remarks 45 years ago, we have witnessed periods of war and peace, inflation and depression, speed in communication and transportation, and remarkable progress in science, labor-saving machines, and living standards. Keeping step with progress the land-grant colleges have experienced extraordinary growth due to a constant demand for offerings, services, and courses bearing on modern thought, methods, and ideas. The trend in student selection of courses has been away from those relating to agriculture and toward the liberal arts (arts and sciences), engineering, and teaching (education).

In this connection the following summary is of interest, since for a single year (1931-32) it reveals by courses of study the proportion of all college students in the United States that are enrolled in the 52

land-grant colleges for white students (first two columns). The last two columns reveal how students in the 52 land-grant institutions select courses and are awarded degrees in certain subjects. The table should be read across as follows: The land-grant colleges draw 97 percent of all men and 97 percent of all women students who take *agricultural courses* anywhere in the United States, but in the 52 land-grant colleges 7.8 percent of the students elect agricultural courses, and only 7 percent of the graduates receive their degrees in agriculture. On the other hand, the land-grant colleges draw only 13 percent of the men and 10 percent of the women college students in arts and science curricula, but these students comprise 37.8 percent of the land-grant college students enrolled, and 34.5 percent of the graduates receive their degrees in arts and science curricula.

SUMMARY—MAJOR CURRICULA IN LAND-GRANT COLLEGES AND UNIVERSITIES, 1931-32

Department of study	Percent of all students studying the given subject in the United States that are enrolled in the land-grant institutions		Percent of all land-grant college students enrolled in the given subject	Percent of degrees awarded in land-grant institutions

Total.....	19	12	100.0	100.0

Since two-thirds of all degrees awarded in the land-grant institutions are in three major divisions—arts and sciences (34.5 percent), engineering (17.4 percent), and education (14.4 percent)—the name “agricultural college” as a generic term, a misnomer from the beginning, has become so outmoded that only a quarter of the institutions still preserve the phrase in their legal names; in the past decade at

least eight institutions have replaced the phrase with "State college" or some other descriptive phrase.

As early as 1871 Commissioner Eaton (Report of Commissioner of Education, 1871, p. 431), recognizing the lack of a general title for these institutions, wrote:

The newspapers and public generally use the term "agricultural colleges", which is not only incorrect, but injurious, because it cherishes a notion that these foundations are only for the promotion of agricultural education. The term "colleges of agriculture and the mechanic arts" would be much more appropriate though not quite comprehensive enough, and it is too long a phrase to become popular. * * * It is to be hoped that, by the action of the Department (of Interior) or by common consent of the authorities of the various institutions, some designation more correct than "agricultural colleges" will come into vogue.

Since 1919 the term "land-grant college" came into popular use by common consent and by action of the Association of American Agricultural Colleges and Experiment Stations in changing its official title to Association of Land-Grant Colleges, and later to Association of Land-Grant Colleges and Universities. The comprehensiveness and diversity of offerings in these institutions was the reason for the change of title.

The aim of the land-grant college as a local unit receiving both State and Federal support is to serve the people in every part of the State in which it is located, and to develop, not into a narrow trade or vocational school, but into a college or university for the people offering a properly diversified program of cultural, technical, and comprehensive subjects in order to develop economic, social, and educational life.

MORRILL-NELSON APPROPRIATIONS, 1933-34

Since 1890 the land-grant colleges and universities have depended upon prompt and regular payment of the Federal appropriations granted by the second Morrill Act. In 1907, these appropriations were increased by the Nelson amendment and since 1911 each State and Territory has received an annual allotment of \$50,000.

On June 10, 1933, the President of the United States in his economy program issued Executive Order No. 6106, which in effect would have curtailed the appropriations by \$12,500, so that each State and Territory would receive \$37,500 instead of the regular amount of \$50,000.

Section 18, of this order reads in part: "The following functions are abolished in part * * * endowment and maintenance of the colleges for the benefit of agriculture and the mechanic arts, 25 percent thereof."

Since this order affected these continuing appropriations, only 25 percent (\$12,500) of the usual allotment was mailed on August 2;

1933; another 50 percent (\$25,000) was mailed during September. The question of the remaining 25 percent was in doubt until February 6, 1934, when in Executive Order No. 6586 President Roosevelt upon further investigation determined that the provisions of section 18 above mentioned were not in the public interest or consistent with the efficient operation of the Government, and revoked the section. Shortly thereafter the final 25 percent (\$12,500) of the Morrill-Nelson moneys was mailed to each State and Territory, so that in the end the land-grant institutions received the usual allotment for 1933-34.

Interest on Morrill-Nelson appropriations.—On January 16, 1933, a decision by the Comptroller General of the United States affected somewhat the value of the Morrill-Nelson appropriations to some institutions. Formerly it was customary to deposit these appropriations at interest and to use the income for the same purposes as the appropriation itself is used. A departmental ruling of April 7, 1917 read:

Should the fund prior to its expenditure by the State for the authorized purpose, earn any increment in the way of interest, said interest likewise becomes part of the fund and must be devoted by the State to the same purpose. * * * This interest is subject to the administration of the United States officials in the same manner as the principal which earns it, and cannot be considered as State funds not subject to Federal administration.

The Comptroller General's decision of January 16, 1933, however, reverses this ruling and reads in part as follows:

* * * I have to advise that the interest accruing upon all such funds (second Morrill Act of Aug. 30, 1890, 26 Stat. 417, and Nelson amendment of Mar. 4, 1907, 34 Stat. 1281) * * * is interest accruing to the United States and should be covered into the Treasury as miscellaneous receipts.

Further rulings provide that the Morrill-Nelson funds must be kept in a deposit account separate from all other funds, and the person duly designated to receive the funds from the Federal Government is responsible for the accounting of such interest as may be credited to the deposit account by the bank in which the deposit account is maintained. These receipts, tabulated for the first time in this bulletin in table 32, column 4 (total \$3,309) for 1932-33, and in table 42, column 5 (total \$1,628) for 1933-34, have been declared by the land-grant colleges, and interest so accrued has been returned and deposited in the United States Treasury as miscellaneous receipts.

MILITARY TRAINING

By virtue of the first Morrill-Act (July 2, 1862), establishing the land-grant colleges, each institution is required to offer "military tactics" along with agriculture and mechanic arts, but in accordance with rulings upon the interpretation of the act, State legislatures have authority to prescribe the manner in which the several subjects shall

be taught. The Department of the Interior has ruled that "the State fulfills its obligation under the law when it offers instruction and provides facilities for instruction in the branches of learning specified in the land-grant college legislation" (ruling July 19, 1923). On June 20, 1930, the Attorney General ruled that "* * * an agricultural college which offers a proper and substantial course in military tactics complies sufficiently with the requirements as to military tactics in the act of July 2, 1862, and the other acts above mentioned, even though the students at that institution are not compelled to take that course." In general the land-grant colleges and universities *require* freshmen and sophomores to take military instruction (except in the University of Wisconsin and the University of Minnesota), and offer advanced elective courses in military science for juniors and seniors. Both the University of Wisconsin and the University of Minnesota offer military instruction, on an optional basis; i. e., students are not required to take the course.

*In the University of Wisconsin military training has been on an optional basis since the fall of 1923, allowing students to choose between physical education, military training, or a combination of the two.

In the University of Minnesota the board of regents by a vote of 6 to 5 (June 18, 1934) placed military training on an optional basis, effective at the opening of the college year 1934-35. The university now maintains two units, "Coast Artillery" and "Signal Corps", with 528 men enrolled.

These are the only two land-grant institutions where military instruction is optional.

Besides the land-grant institutions there are 17 State colleges and universities, 1 municipal university, 7 denominational colleges, and 11 privately controlled colleges that *require* students to take military training.

From figures supplied by the War Department the following summary has been made revealing that the total male enrollment as of March 1934 in the colleges providing military instruction (R. O. T. C.) was 179,841 students, and of these 67,947 were in the R. O. T. C. Eighty-six of the 124 colleges *required* men students to take the basic course. All land-grant colleges are included except the University of Alaska, and these institutions are detailed in the following table, which shows that of a total male enrollment of 93,221 there were 43,342 students in military training; the operating cost for such training to the Federal Government in 1932-33 was \$3,358,823.

Often when the land-grant colleges make reports to the Department of the Interior military training funds are not included, for the reason that these funds are not handled through the college treasurer but are direct payments made through the War Department, where a

separate accounting is kept of all Federal money for R. O. T. C. units. These accounts are kept on a basis of "corps areas" and have been separated in this report on a basis of "control" of institutions.

SUMMARY OF MILITARY TRAINING (R. O. T. C.) IN THE UNITED STATES

[NOTE.—Figures supplied by War Department]

Type of Institution	NUMBER WITH R. O. T. C.		Total male enrollment, March 1934	MILITARY ENROLLMENT, MARCH 1934			Total operating cost to Federal Government, 1932-33

UNIVERSITY OF ALASKA

The Territory of Alaska was the last of the States and Territories to accept the conditions of the land-grant college legislation. By an act of Congress approved March 4, 1915, section 33 was reserved in each township in the Tanana Valley between parallels 64 and 65 north latitude and between the one hundred and forty-fifth and one hundred and fifty-second degree of west longitude for the support of a Territorial agricultural college and school of mines. The Territorial legislature in 1917 accepted the grants of land and the Federal appropriations made by the Morrill-Nelson Acts designating the Alaska Agricultural College and School of Mines as the beneficiary. In 1921 the legislature appropriated funds for the administration of the college and in the fall of 1922 it opened with six students enrolled. In 1933-34 enrollments had increased to 89 men and 64 women in residence courses; 39 men and 25 women were freshman students.

By an act approved March 12, 1935, the University of Alaska was created "in accordance with the provisions of the act of Congress approved March 4, 1915, to grant a charter to the University of Alaska and to empower the University of Alaska to succeed to all the rights, powers, privileges, and duties of the Alaska Agricultural College and School of Mines" (effective July 1, 1935).

SECTION 1. There is hereby established a University of Alaska which shall consist of the College of Agriculture, the School of Mines, the Department of Agricultural Experiment Station, the Department of Agricultural Extension Work, now a part of the Alaska Agricultural College and School of Mines, and such other colleges and departments either as are now existing in the Alaska Agricultural College and School of Mines or as may from time to time be established, including departments of anthropology, archaeology, ethnology, museum, natural history, and palaeontology.

The University of Alaska has the distinction of being the farthest north of any higher educational institution.

PREVIOUS ANNUAL REPORTS

Annual reports on land-grant colleges have been published for half a century. Until 1917 these reports were bound with the annual report of the Commissioner of Education. Since that year (beginning 1918), the report of the Commissioner of Education has been issued biennially and the separate land-grant college reports have not been bound with this volume until the year 1929-30 and thereafter. In order that students and research workers may readily have access to these separate reports the following references are listed in chronological order:

- Until 1917—See Annual Report of Commissioner of Education.
- 1918—Agricultural and Mechanical Colleges, Bulletin 1920, no. 8.
- 1919 and 1920—Statistics of Agricultural and Mechanical Colleges, Bulletin 1922, no. 17.
- 1921—Statistics of Land-Grant Colleges, Bulletin 1922, no. 34.

COMPARATIVE SUMMARY FOR 1932-33 AND 1933-34

STAFF, STUDENTS, AND FINANCES	1932-33		1933-34	
	52 land-grant colleges (white)	Total (69) including 17 Negro land-grant colleges	52 land-grant colleges (white)	Total (69) including 17 Negro land-grant colleges
1	2	3	4	5
I. STAFF				
Professors, instructors, extension workers, and experiment station staff.....	23,601	24,355	25,029	25,893
II. STUDENTS				
Of college grade: Total.....	173,373	178,879	165,663	171,144
Undergraduates (resident).....	152,429	157,772	147,827	154,093
Specials.....	2,796	2,938	2,661	2,874
Graduate students.....	18,816	18,817	15,623	16,173
Nonresident students:				
Correspondence.....	23,984	24,156	20,147	20,318
Extension.....	39,235	42,086	43,368	45,715
Summer session 1932 and 1933.....	64,422	70,186	48,755	53,600
Freshman students.....	40,927	42,661	42,622	43,539
Military science and drill.....	43,181	43,754	46,188	46,760
Not of college grade: Not tabulated.				
III. DEGREES				
First degrees.....	28,314	29,102	27,403	28,133
Master's.....	5,251	5,261	4,224	4,224
Doctor's.....	887	887	967	967
IV. LIBRARIES				
Number of bound volumes.....	9,810,768	9,938,163	10,484,547	10,714,293
V. PROPERTY VALUES				
Lands (campus and farms).....	\$50,483,179	\$51,901,171	\$59,178,784	\$60,740,171
Buildings and improvements.....	267,302,931	278,527,053	264,125,957	275,261,809
Equipment, books, apparatus, stock, etc.....	95,249,087	97,172,962	98,278,409	100,080,434
Funds:				
Endowment.....	111,203,110	111,376,110	115,604,974	115,993,845
Student aid.....	14,175,793	14,177,916	16,529,075	16,529,737
Other funds.....	11,891,575	11,902,962	12,860,192	12,870,192
Total value of property and funds.....	550,305,675	565,058,174	546,577,391	561,861,938
VI. FEDERAL LAND-GRANT FUNDS (ENDOWMENTS)				
1862 land-grant:				
Amount of fund (cash).....	22,378,968	22,781,465	22,948,246	23,350,743
Value of unsold lands.....	6,450,941	6,450,941	13,726,827	13,726,827
Income (tables 33 and 43).....	956,041	971,254	1,111,223	1,127,344
Other land-grants: Income.....	534,191	534,191	519,016	524,794
VII. FEDERAL APPROPRIATIONS				
Morrill-Nelson, 1890 and 1907.....	2,300,315	2,550,000	2,301,954	2,550,000
Hatch-Adams, 1887.....	1,456,347	1,456,347	1,415,919	1,415,919
Smith-Lever, 1914.....	6,200,833	6,200,833	5,999,180	5,999,180
Smith-Hughes, 1917.....	318,288	362,056	481,231	528,395
Clarke-McNary, 1924.....	59,751	59,751	55,117	55,117
Purnell, 1925.....	2,653,860	2,653,860	2,728,008	2,728,608
Capper-Ketcham, 1928.....	1,479,632	1,479,632	1,454,617	1,454,617
Additional cooperative extension funds.....	930,574	930,574	947,298	947,298
Temporary funds.....	71,748	72,953	130,466	130,466
Military training funds (War Department).....	3,358,823	3,358,823	552,322	552,322
Grand total (including endowment income).....	16,961,583	17,271,454	17,144,634	17,461,744

* Loan funds only.

* Annuity funds only.

* Military funds are not included in total.

* Partial total for 13 colleges.

YEAR SUMMARIES (52 INSTITUTIONS FOR WHITE STUDENTS)

- 14 Includes 5 men.
- 15 Includes 1 woman.
- 16 Not distributed.
- 17 Includes 1 man.
- 18 Includes 2 women.
- 19 Includes mechanics.

? Includes 3 women.

^a Includes 4 men.
^b Women included with men.

^a Includes 2 men.

Includes hotel training.

Includes 3 men.

TABLE 38.—FINANCES, 1933-34

Land-grant institution	RECEIPTS FOR —					EXPENDITURES FOR —				
	1	2	3	4	5	6	7	8	9	10
